PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 7+ years of experience designing and delivering scalable web and mobile applications across enterprise ERP, multi-tenant SaaS, CRM, and EdTech (SIS/LMS) systems. Deep expertise in PHP/Laravel backend architecture and React/React Native frontends, with strong command of MySQL and PostgreSQL data modeling, RESTful API design, real-time systems, and containerized production deployment. Founder and sole engineer of RetailPulse, a multi-tenant retail ERP SaaS built as a modular monolith. Proven track record on large-scale platforms serving thousands of users, and eager to contribute to international, product-focused engineering teams.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), TypeScript, Python, SQL

Frameworks & Libraries: Laravel, Inertia.js, React, Next.js, React Native (Expo), Node.js, Vue.js

Frontend: HTML5, CSS3, Tailwind CSS, Ajax

Databases & Realtime: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, Laravel Reverb (WebSockets)

DevOps & Cloud: Docker, Laravel Octane, FrankenPHP, Horizon, Nginx, CI/CD, Linux, VPS Deployment

Mobile & BaaS: Supabase, Firebase Cloud Messaging (FCM)

Integrations & Payments: REST APIs, Stripe, Square API, EasyPaisa, JazzCash, Google & Microsoft Services

Architecture & Practices: Multi-Tenant SaaS, Modular Monolith, MVC, ERP Systems, Real-Time Systems, API Design, Git

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Beaconhouse Technology, Lahore, PK June 2025 – Present

- Deliver frontend features across Beams360, a large-scale EdTech platform (CRM, CMS, SIS, LMS) built on a MERN stack with Python microservices, spanning regional school portals in Pakistan, Dubai, and Malaysia.
- Contribute to Supernova SIS, a student information system, driving module enhancements, performance optimization, and scalability; introduced reusable production release automation adopted by the team.
- Own the United Charter School (UCS) ERP end to end, streamlining academic, administrative, and operational workflows with a performance-optimized architecture.
- Built an Emirates ID card-reading integration and shipped gradebook and assessment-audit reporting features used across institutions.

Senior Software Engineer — Back Bone Technology, Lahore, PK July 2024 – June 2025

- Built a call-center CRM platform with Laravel, Vue.js, MySQL, and Elasticsearch, incorporating VoIP/SIP integration and high-performance real-time search.
- Developed and maintained a scalable, high-performance Content Management System (CMS) using Laravel, Vue.js, MySQL, Redis, and Elasticsearch.
- Spearheaded backend and frontend enhancements for a Customer Service & Relationship (CSR) portal, optimizing customer-support workflows.

Senior Software Engineer — Softpers Interactive, Lahore, PK July 2023 – July 2024

- Built MineIQ, a mine management system with ticket-based workflows for task tracking and team management, using React and Laravel.
- Developed the Congo Cloth Company (CCC) platform with Laravel, Inertia.js, and React, featuring multi-role access (Personnel, Business, Admin) and a custom points/referral system.

Software Engineer — IKS Logics Pvt Ltd, Lahore, PK November 2021 – July 2023

- Developed iProsper CRM (PHP, Cervo, React), integrating Stripe and PayPal for payments and synchronizing data with Google and Microsoft services.
- Built a Pet Health Data platform in Laravel enabling veterinary professionals to manage records and communicate securely with pet owners.
- Delivered additional client web applications with third-party service and payment-gateway integrations.

Software Engineer — Viltco Technologies, Lahore, PK

December 2020 – November 2021

- Created a Time Sheet Management System in Core PHP to streamline time tracking and HR operations.
- Developed the online food-service module for a Restaurant Management System using Laravel and React, improving ordering and delivery.

KEY PROJECTS

RetailPulse — Multi-Tenant Retail ERP (SaaS) | Laravel 13, Inertia, React, MySQL, Reverb, Docker

Founder & sole developer. Modular monolith covering accounting, HR/payroll, inventory, and fixed assets. Built a streaming import/export engine (OpenSpout, two-phase validate/process) and a real-time layer over Laravel Reverb/Echo. Deployed to production with Laravel Octane on FrankenPHP and Horizon queues on a self-managed VPS via Docker.

PennyPilot — Personal Finance Mobile App | React Native (Expo), Supabase, FCM, TypeScript

Founder & sole developer. Cross-platform budgeting and expense-tracking app for Pakistani households, with a Supabase (auth + Postgres) backend and Firebase Cloud Messaging for reminders; built documentation-first with ADRs, coding rules, and a gaps register.

Beams360 — EdTech Platform (CRM/CMS/SIS/LMS) | React, Node.js, Python, MongoDB

Frontend across multi-region school portals, including LMS content delivery, an Emirates ID integration, and gradebook/assessment reporting.

Supernova SIS — Student Information System | React, Node.js, MongoDB

Module enhancements, performance and scalability work, and reusable production release automation for safer, repeatable deployments.

MineIQ — Mine Management System | React, Laravel, MySQL

Ticket-based task tracking and team-collaboration workflows for mining operations.

iProsper CRM — CRM Platform | PHP, Cervo, React, MySQL

CRM with Stripe/PayPal payment integration and Google/Microsoft data synchronization.

EDUCATION

Bachelor of Science in Software Engineering

June 2018

Virtual University of Pakistan — Lahore, Pakistan

CERTIFICATIONS

- Mastering Full Stack — Laravel / React JS (Udemy)
- SQL Mastery (Udemy)

LANGUAGES

- English — Professional Working Proficiency
- Urdu — Native
