PROFESSIONAL SUMMARY

Senior full-stack engineer building production web applications since December 2020, specialising in PHP/Laravel, React and MySQL. Develop ERP, SaaS and CRM systems with a focus on billing, payments, accounting and reliable background processing. Hands-on experience with transaction handling, database concurrency, automated regression testing and deployment on AWS and VPS platforms.

CORE TECHNICAL SKILLS

Backend: PHP, Laravel, REST APIs, queues, transactions, Redis, Laravel Horizon, Octane, Reverb

Frontend: React, TypeScript, JavaScript, Next.js, Inertia.js, Vue.js, Tailwind CSS

Data: MySQL, PostgreSQL, Elasticsearch; relational modelling, query optimisation and locking

Cloud & deployment: AWS, Linode, Contabo, Hostinger, Docker, Linux, Nginx, CI/CD, Git

Quality & integrations: automated testing, code review, production debugging; Stripe, PayPal, Square, Google/Microsoft APIs

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Beaconhouse Technology

Lahore, Pakistan | June 2025 - Present

- Develop PHP/Laravel and React features for Supernova SIS, a multi-branch school ERP serving 10,000+ students, across billing, payments, accounting, payroll and attendance.
- Investigate and resolve challan, concession and carry-forward inconsistencies across invoices, payments and journal entries; add regression coverage for financial edge cases.
- Harden concurrent billing and payment imports with transaction handling, per-student locking, duplicate-processing safeguards and job dispatch after commit.
- Own UCS ERP development and contribute frontend features to Beams360, a separate MERN platform with Python microservices, including LMS, gradebook and assessment reporting.

Senior Software Engineer | Back Bone Technology

Lahore, Pakistan | July 2024 - June 2025

- Built call-center CRM features using Laravel, Vue.js, MySQL and Elasticsearch, including VoIP/SIP integration and real-time search.
- Developed CMS and customer-service portal workflows with Laravel, Vue.js and Redis, covering backend APIs, interfaces and content/search functionality.

Senior Software Engineer | Softpers Interactive

Lahore, Pakistan | July 2023 - July 2024

- Built ticket-based task and team workflows for MineIQ using Laravel, React and MySQL.
- Developed Congo Cloth Company with Laravel, Inertia and React, including multi-role access and order/referral rewards.

Software Engineer | IKS Logics Pvt Ltd

Lahore, Pakistan | November 2021 - July 2023

- Developed iProsper CRM with PHP and React, integrating Stripe/PayPal payments and Google/Microsoft services.
- Built Laravel applications for veterinary records and NFC event attendance; integrated Square APIs into a React restaurant application.

EARLIER EXPERIENCE

Software Engineer | Viltco Technologies

Lahore, Pakistan | December 2020 - November 2021

- Built Core PHP budget and time-sheet workflows; developed an online food-ordering module with Laravel and React.

SELECTED ENGINEERING WORK

RetailPulse | Retail ERP & POS SaaS

Personal product | Laravel 13, React, Inertia, MySQL, Redis, Reverb, Docker

Founder and sole developer of a modular monolith spanning accounting, inventory, purchasing, sales, HR/payroll and fixed assets. Designed branch-aware permissions and approval workflows. Built a streaming import/export engine with separate validation and processing stages, queued jobs and real-time updates. Configured Docker-based deployment with Nginx, Octane and Horizon on a Contabo VPS. Screenshots and a recorded walkthrough are available in my portfolio; the source code is private.

Supernova SIS | School ERP

Beaconhouse Technology | PHP, Laravel, React, MySQL, queues

Develop and maintain financial and operational workflows in a multi-branch school system. Investigate production data inconsistencies, payment reconciliation and concurrency failures. Implement transaction and locking safeguards and regression coverage for billing, payment reversals and carry-forward calculations. Client administrative access and code remain private.

iProsper CRM | Payments & integrations

IKS Logics | PHP, Cervo, React, MySQL

Delivered CRM functionality with Stripe and PayPal payment integration and Google/Microsoft data synchronisation. Portfolio screenshots show the client application without exposing login credentials.

Beams360 | Education platform

Beaconhouse Technology | React frontend; MERN platform with Python microservices

Contribute frontend features for school portals, including LMS workflows, gradebook and assessment reporting, and an Emirates ID card-reading integration. This is a separate platform from the Laravel-based Supernova SIS.

ADDITIONAL EXPERIENCE

React Native (Expo), Supabase and Firebase Cloud Messaging through PennyPilot, a personal budgeting application. Additional experience with Node.js, Python and MongoDB across project work. Core specialisation remains Laravel and React.

EDUCATION

BS Software Engineering | Virtual University of Pakistan | June 2018

PROFESSIONAL DEVELOPMENT

Mastering Full Stack - Laravel / React JS (Udemy) | SQL Mastery (Udemy)

LANGUAGES

English - Professional working proficiency | Urdu - Native
