PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 6+ years of hands-on experience designing and delivering scalable web applications across enterprise ERP, SaaS, CRM, LMS, and real-time systems. Specialized in PHP/Laravel backend architecture and React JS frontends, with strong proficiency in MySQL database design, RESTful API development, and third-party integrations. Experienced working in cross-functional teams on large-scale platforms serving thousands of users. Eager to contribute to international teams and challenging software products.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), SQL

Frameworks & Libraries: Laravel, React JS, Next JS, React Native, Node JS, Inertia.js, jQuery

Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap, Ajax

Databases: MySQL, PostgreSQL, SQL Server, MongoDB, Redis, Elasticsearch

Tools & Integrations: Git, Stripe, Square API, NFC Integration, Convex, REST APIs, Third-Party API Integrations

Concepts: MVC Architecture, SaaS Development, ERP Systems, Real-Time Systems, Multi-Tenancy

WORK EXPERIENCE

Senior Software Engineer | Beaconhouse Technology — Lahore, PK June 2025 – Present

- Solely managing and developing the United Charter School (UCS) ERP — a comprehensive school management platform streamlining academic, administrative, and operational workflows.
- Responsible for full-stack development including module enhancements, performance optimization, and system scalability using modern web technologies.
- Contributing to Beams360, a large-scale EdTech platform integrating CRM, CMS, SIS, and LMS functionalities built on the MERN stack with Python-based microservices.
- Led development and maintenance of the LMS module, ensuring robust content delivery, user management, and interactive learning features across the platform.

Senior Software Engineer | Back Bone Technology — Lahore, PK July 2024 – June 2025

- Contributed as a full-stack developer to a robust CRM platform for call center operations using Laravel, Vue.js, MySQL, and Elasticsearch.
- Developed and maintained a scalable, high-performance Content Management System (CMS) using Laravel, Vue.js, MySQL, Redis, and Elasticsearch.
- Spearheaded backend and frontend enhancements for a Customer Service & Relationship (CSR) portal optimizing customer support workflows.

Senior Software Engineer | Softpers Interactive — Lahore, PK July 2023 – July 2024

- Contributed to MineIQ, a comprehensive mine management system implementing ticket-based workflows for task tracking and team management using React JS and Laravel.
- Developed Congo Cloth Company (CCC) platform using Laravel, Inertia.js, and React JS with multi-role support (Personnel, Business User, Admin) and a custom points system for orders and referrals.

Software Engineer | IKS Logics Pvt Ltd — Lahore, PK November 2021 – July 2023

- Developed iProsper CRM using PHP, Cervo, and React JS — integrated Stripe and PayPal for payment processing, and synchronized data with Google and Microsoft services.
- Built a Pet Health Data Website using Laravel enabling veterinary professionals to manage pet health records and securely communicate with pet owners.

- Led backend development of Ting, an Event Management System using Laravel with NFC technology for seamless attendance tracking.
- Enhanced Jane Bond BBQ restaurant management system using React JS and Square Point APIs.

Software Engineer | Viltco Technologies — Lahore, PK December 2020 – November 2021

- Developed a Capex Budget Management System in Core PHP enabling efficient inventory requests, approvals, and budget management.
- Created a Time Sheet Management System using Core PHP to enhance time tracking and HR operations.
- Developed the online food service module for a Restaurant Management System using Laravel and React JS, enhancing ordering and delivery processes.

EDUCATION

Bachelor of Science in Software Engineering

June 2018

Virtual University of Pakistan — Lahore, Pakistan

KEY PROJECTS

UCS ERP System | *Laravel, React JS, MySQL*

Role: Full-Stack Developer (Sole Owner)

Summary: Comprehensive school management ERP covering academic, administrative, and operational workflows with performance-optimized architecture.

Beams360 LMS | *MERN Stack, Python Microservices*

Role: Full-Stack Developer

Summary: Large-scale EdTech platform with CRM, CMS, SIS, and LMS modules serving thousands of students across multiple institutions.

MinelQ | *Laravel, React JS, MySQL*

Role: Full-Stack Developer

Summary: Mine management system with ticket-based task tracking and team collaboration workflows.

iProsper CRM | *PHP, Cervo, React JS, MySQL*

Role: Full-Stack Developer

Summary: CRM platform with Stripe/PayPal payment integration and Google/Microsoft data sync.

Ting Event Management | *Laravel, MySQL*

Role: Backend Developer

Summary: Event management system with NFC-based attendance tracking and user management.

Congo Cloth Company (CCC) | *Laravel, Inertia.js, React JS*

Role: Full-Stack Developer

Summary: E-commerce platform with role-based access, points/referral system, and order management.
